

BROAN®

Looks like a light, works like a fan,
acts like an auto on/off switch.

Introducing the Broan humidity sensing fan/light. At a casual glance, you'd never know that a ventilation fan is at work above your shower. While the Broan 744SFL looks like a recessed light, inside is a humidity sensing switch—one that triggers a cleverly concealed and quiet ventilation fan. The switch knows when the shower begins by sensing a quick jump in humidity. It also shuts off automatically when the job is done so the fan doesn't run all day, or waste energy. Sounds smart? Contact Broan at 800-558-1711 for a distributor near you, or visit www.Broan.com.

It's the quiet fan you'd never guess was even there.

Presenting the humidity sensing recessed fan/light from Broan.

Looking for inconspicuous ventilation? The Broan 744SFL humidity sensing recessed fan/light is the perfect solution. Inside, our exclusive SensAire® technology automatically starts a quiet, powerful fan to clear moisture when a rapid rise in humidity is detected. It also operates with a wall switch just as you would a conventional ventilation fan. Set the internal timer from 5–60 minutes and you'll rest assured knowing moisture has been cleared and not worry about the fan running all day long.

- High efficiency centrifugal fan delivers 70 CFM at 1.5 sones
- SensAire® technology detects the rapid rise in humidity over time
- Sensitivity level is adjustable
- Auto shut-off, adjustable from 5–60 minutes
- Can also be operated manually
- 6" white trim matched to designs of major recessed light manufacturers
- Multiple units can easily be used in larger rooms
- Energy efficient lighting—one 14 Watt (max) PAR30 shape, fluorescent bulb (included)
- UL Listed for use over tub or shower when connected to a GFCI protected branch circuit
- 6-7/8" high housing fits new construction and 2" x 8" ceiling joists
- 4" round duct connector
- Type IC, sealed housing
- Energy Star qualified
- Title 24 compliant
- Not for use over cooking surfaces

SensAire® technology behind the trim detects changes in humidity and automatically turns the fan on and off.

Model	CFM	Sones	Lighting	Bulb Type	Energy Star	Ducting
744SFL*	70	1.5	14 W Fluor.	PAR30	Yes	4"

Energy Star fans use 65% less energy, on average, than standard models and may qualify for local utility rebates.

*Fluorescent lighting, Title 24-compliant.
