

# UNITED COPPER INDUSTRIES

- Sequential Countdown Marking
- SLK™ Slick Wire Technology
- Environmentally Friendly

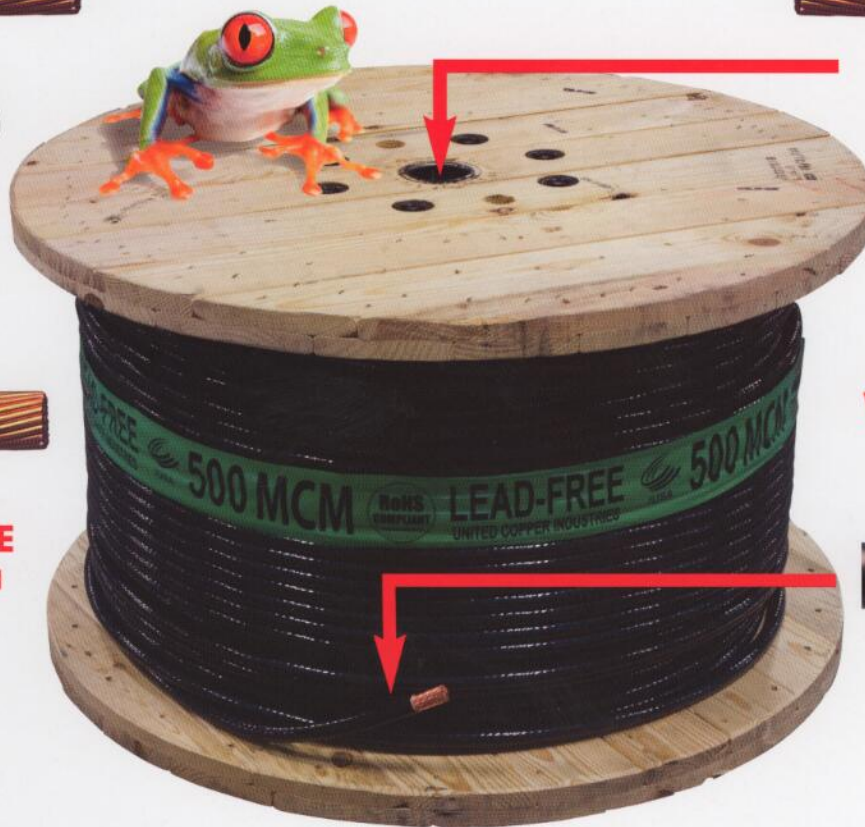

**SLK™**  
**TECHNOLOGY**

**SEQUENTIAL  
COUNTDOWN  
MARKING**  
on standard reels of  
THHN 1/0 and larger

**LEAD FREE  
BUILDING WIRE**  
for a cleaner, greener world

**WHAT YOU SEE  
IS WHAT  
YOU'VE GOT**

Controlling copper wire inventories can have a significant effect on the bottom line in today's construction market. More efficient use of resources is what we had in mind when we installed sequential countdown marking on our reels of THHN (1/0 and larger). Our numerical increments identify how many feet you buy, how many you sell, and the balance on the reel. The total capacity of the reel is clearly indicated on the first foot used, and the reel continues counting down to the last foot. What you see is what you've got.

United Copper's environmentally friendly Lead Free building wire has been a tremendous success; it's just good business. Now it's available with sequential countdown marking in master reels of THHN with SLK™ slick wire technology.

*Now you know exactly how much of a good thing you've got.*

Accurate inventory  
control on every spool
